## 10 Pct. Off Normal Is Report By USSC

The 1964-65 sugar cane harvest of the United States Sugar Corp., largest company of its kind in continental United States, ended last week.

The freeze of the past winter affected the harvest of cane, reducing the amount of sugar per ton of cane and the amount of cane per acre.

W. C. Hewitt, vice president, agricultural company, said the yield was as could be expected. It was estimated to be about 10 per cent off a normal harvest free of freeze.

Mr. Keen was delighted with the report and stated that his Canal Point distributorship had had a small part in helping to set the new all-time record.

## Cost Factors Will Control Plan For New Quaker Plant

Location of a manufacturing plant in the Belle Glade area by The Quaker Oats Company "is just a possibility and nothing definite has been decided," according to William J. Miller, Jr., General Manager of Sugar Cane Growers Cooperative of Florida.

Mr. Miller said representatives of The Quaker Oats Company's chemical division have been in Belle Glade recently, exploring the feasibility of constructing a furfural plant in Belle Glade. "But is it too early to say that a plant will be built," Mr. Miller said. "Exploration is in the early stages and I understand it will be at least a couple of months before The Quaker Oats Company can determine whether it would be practical to put a plant in Belle Glade."

If a plant were to be located, in Belle Glade, Mr. Miller said, it would utilize bagasse or sugar cane residue as a raw material. Furfural made originally from oat hulls, also can be made from corn cobs or almost any other agricultural material containing cellulose.

"I understand that furfural competes with a number of other chemicals," Mr. Miller said, "and whether a plant will be built in Belle Glade depends heavily on cost factors." He added that the manufacture of furfural has "no undesirable side effects so far as the community is concerned." It is a very clean process, and there is no pollution of the atmosphere.

## Largest Building In World "Topped Out" At Kennedy

A ceremony featuring some of the top names in American industry, space exploration and the military was announced today for "topping out" the world's largest building, National Aeronautics and Space Administration's Vehicle Assembly Building at Merritt Island, Florida, April 14.

Making the announcement was J. Donald Rollins, president of United States Steel's American Bridge Division, host for the event. American Bridge fabricated and erected the 57,000-ton steel skeleton for the Vehicle Assembly Building where giant Saturn space vehicles will be assembled in upright positions for manned voyages to the moon.

The ceremony is scheduled to begin at 11 a. m. at the building site in the Merritt Island Launch Area, with music by the Third Army Band from Fort McPherson, Ga.

Following brief remarks by Dr. von Braun, Dr. Debus, Generals Wilson and Welling, Col. Starnes, and Messrs. Paddock and Rollins, a signal will be given to hoist the 30-foot steel beam, containing hundreds of autographs, 524 feet, to the top of the building. A distinctive white, the beam will stand out in the structure as a tribute not only to everyone who has participated in construction of the building, but to every American, as well, who has a vital interest and stake in the U. S. manned space program.

Following the ceremony, American for participants, invited guests and newsmen. NASA Public Affairs will conduct a guided tour of the Merritt Island Launch Area and Cape Kennedy for the group during the afternoon.

Popularly known as the VAB the structure has been called one of the most monumental construction projects since the pyramids.

Not only does it contain more cubic volume than any other structure in the world, it is also one of the most unusual from the standpoint of design, due to the large open bays necessary to assemble Apollo-Saturn V space vehicles in a vertical position.

## Farris Can Keep His Company Title

Tallahassee — Former Gov. Farris Bryant of Jacksonville and other officers of the new insurance firm can keep the name "National Life Insurance Co. of Florida."

Insurance Commissioner Broward Williams authorized use of the name after studying testimony taken in two hearings and studying judicial decisions.

Shortly after Bryant and other state financial leaders organized the company, two established companies objected to the name that was selected.

Williams said Florida law requires disapproval of a new insurance company's name only if the commissioner is of the opinion the proposed name is so similar to those of existing companies that it will cause confusion.

Bob Myer has returned to his duties as instructor at Dade Junior College, Miami following a visit with his wife, Mrs. Bob Myer, and son, Butch, at the home of her parents, Mr. and Mrs. J. V. Thomas.

ORLANDO—The fourth annual Florida Industries Exposition, set for Orlando April 27-30, will have an added attraction this year.

Charles W. Campbell, chairman of the sponsoring Florida Development Commission, has disclosed that a Festival of Florida Food Products will be a part of the exposition for the first time.

Campbell described the exposition as a spectacular showcase of what Floridians can produce and the food industry is an important segment of the state's economy.

State Agricultural Commissioner Doyle Conner explained the project as part of a long-range goal of building an effective marketing place for Florida agricultural products.

The exposition was developed in order to boost sales of Florida products and in the past many major contracts have been executed on the display floor, making the exposition not only a showplace, but a marketing place as well.

## Economy To Rule In House During 1965

TALLAHASSEE — House Speaker-designate E. C. Rowell of Sumter County says house management under him will be as economical during the 1965 session of the Legislature as he expects state agencies to be.

One item to save expenses during the session is the installation of four-watt telephone lines for unrestricted long distance calling. With a \$2,400-a-month charge for the lines, legislators will have no limit on how many calls they make, including personal and business calls as well as state business.

In the past, the state has picked up the tab for many long distance calls made by legislators, many of which were personal.

H. C. Dyess recently returned to his home following surgery at Good Samaritan Hospital, West Palm Beach.

# New $3\frac{3}{4}\%$ interest on U.S. Savings Bonds

*The Treasury explains why the new ones you buy and the ones you own now are better than ever*

**Q: How does the new  $3\frac{3}{4}\%$  interest rate benefit me?**

**A:** With Series E Bonds, the rate turns \$18.75 into \$25.00 fourteen months faster than the old rate. Your savings increase faster, because your Bonds mature in just 7 years, 9 months.

With Series H Bonds, the 10-year maturity period stays the same but more interest is paid you each six months. With both E and H Bonds the new rate works out to  $2\frac{1}{4}\%$  for the first year and a half; then a guaranteed  $4\%$  each year to maturity.

**Q: When did the new rate become effective?**

**A:** June 1, 1959.

**Q: Does the new rate change the Bonds I bought before June 1, 1959?**

**A:** All older E and H Bonds pay more now—an extra  $\frac{1}{2}\%$  from now on, when held to maturity. The increase takes effect in the first full interest period after June 1.

**Q: Will the Bonds I own automatically earn their new rate?**

**A:** Yes. You don't need to do a thing—just hold on to your Bonds.

**Q: When my E Bonds mature, will they keep on earning interest?**

**A:** Yes. An automatic 10-year extension privilege went into effect along with the new interest rate. This means your E Bonds will automatically keep earning interest after maturity.

**Q: With the new interest rate, should I cash in my old Bonds and buy new ones?**

**A:** No. The automatic  $\frac{1}{2}\%$  increase makes it unnecessary—and in almost every case it is to your advantage to retain your present Bonds.

**Q: How are series H Bonds different from series E Bonds?**

**A:** The chief difference is this: You buy H Bonds at full face value and the interest is paid by Treasury

check every six months for the life of the Bond. You buy E Bonds at 75% of face value and the interest accumulates to maturity. H Bonds provide income for living expenses, while E Bonds build a nest egg for the future. That's why many retired people hold H Bonds and families saving for, say, a child's education, buy E Bonds.

**Q: In what denominations can I buy series E and series H Bonds?**

**A:** E Bonds: \$25 (cost \$18.75), \$50 (cost \$37.50), \$100 (cost \$75.00), \$200 (cost \$150.00), \$500 (cost \$375.00), \$1,000 (cost \$750.00), \$10,000 (cost \$7,500.00).

H Bonds: \$500, \$1,000, \$5,000 and \$10,000. They are priced at face value.

**Q: How safe are U.S. Savings Bonds?**

**A:** Savings Bonds are an absolutely riskless way to save. The United States Government guarantees the cash value of your Bonds will not drop, that it can only grow.

**Q: What if my Bonds should be lost, stolen or destroyed?**

**A:** You can't lose. Every Bond purchased is recorded by the Treasury. If anything happens to your Bonds they are replaced—free.

**Q: Where can I buy Bonds?**

**A:** Buy E Bonds at any bank—it takes only a few minutes. Buy them automatically through the Payroll Savings Plan where you work. This Plan means you can have any amount you name automatically deducted every payday. The Bonds you buy by installments are delivered to you automatically, too. Your bank will take your order for H Bonds.

**Q: How do I help strengthen America's peace power when I buy U.S. Savings Bonds?**

**A:** Peace costs money—money for military strength and for science. And money saved by individuals helps keep our economy sound.

## HOW ABOUT YOU?

IT'S TOO GOOD TO BE JUST FOR THE YOUNG

## Why should you buy

U. S. Savings Bonds when there are so many other good investments?

To help your country is one answer—and a good one.

But Bonds have other advantages that make them worth your consideration.

For instance, they offer you just about the easiest way to save money: either with the Payroll Savings Plan where you just ask your employer to put part of your wages aside toward a Bond or through regular purchase of Bonds at your bank.

Another unique advantage of U. S. Savings Bonds is the way they stick with you. You can get your money any time.

But if you're like most people, you'll hang on to your Savings Bonds for the big things you want in your future.

And, of course, Bonds are a safe investment—as long as there's a United States of America.

Which brings us back to your country again. Bonds help defend freedom at a time when the enemies of freedom are stronger than ever.

Buy Savings Bonds. The banks or savings institutions that sell them don't charge you a penny for the service.

Keep freedom in your future.

## How to speak out for freedom today

Free men have never gone in much for silence. Even before the first thirteen States became United States, men were speaking for freedom loud and clear.

Today Americans speak out for freedom many ways—in Congress, in local government, in neighborhood activities. Some speak out for freedom in other languages, in other lands. And millions of Americans speak out for freedom every time they buy U.S. Savings Bonds.

Every Savings Bond you buy is an investment in freedom. While you're saving money for your

own family's future, you're helping Uncle Sam tend to the business of keeping men free today.

Perhaps you don't speak out for freedom in the same tone of voice when you buy a Bond as Patrick Henry did in his famous speech. But you speak every bit as surely. And every bit as proudly.

Why not speak out for freedom now? Buy Bonds at the bank or on the Payroll Savings Plan where you work.

Keep freedom in your future with

**Chevelle.** This one's got lively looks, spirited power, a softer ride—and remarkable room atop a highly maneuverable wheelbase. No wonder it's today's favorite mid-size car.

**Chevy II.** No car so trim has a right to be so thrifty. But thrifty it is, with money-savers like brakes that adjust themselves and a long-lived exhaust system.

## Budget "Tight" As 65 Session Opens

Governor Haydon Burns spelled out a firm no-tax increase policy to the opening of the 1965 Florida Legislature Tuesday and bluntly warned that failure to reapportion would be inviting the federal courts to take over.

An overflow crowd jammed the balconies of the flower-banked House to hear the state's 35th chief executive detail his program to a joint session of senators and representatives.

House Speaker E. C. Rowell joined with Burns in urging a firm stand against new taxes.

He said the budget is "admittedly tight" but that with a \$13 million cushion against possible revenue declines, the needs could be met without increases.

Senate President James E. Connor, while not as outspoken against new taxes, stressed that he will insist on a balanced budget — "a budget in which the anticipated revenues will be sufficient to cover the costs of appropriations that we adopt."
